TOUCHLESS HYGIENE
SLEEK, STYLISH, EFFICIENT

We all know that bathrooms harbour germs and that these germs are concentrated on surfaces that are most commonly touched, such as toilet and urinal flush levers, mixer taps and soap dispenser nozzles. Even with impeccable hand washing in line with the latest health authority guidelines, the risk of contamination remains.

So, what’s the solution? Upgrading public and private bathrooms with the latest in touchless bathroom technology not only decreases the risk of users coming into contact with potentially harmful bacteria, it has other persuasive benefits, from increased water efficiency to prolonged product lifespan.

KEY BENEFITS:

• Minimizes the spread of germs found on mixer handles
• Reduces water waste. Increased efficiency
• Easy to use
• Cost effective
As the importance of robust hygiene continues to come to the fore of the global public agenda, it comes as no surprise that the popularity of touchless bathroom products is rapidly increasing.

The SANIPEX GROUP has a wide range of touchless bathroom products to choose from, such as toilet and urinal touchless flush plates, mixers, soap and hand sanitiser dispensers, hand dryers and more.

Not only do these high-quality touchless products feature the latest infrared technology and exceptional performance efficiency, they score highly in terms of aesthetic appeal - meaning that your public washroom or private bathroom will look great while safeguarding the health and wellbeing of everyone who uses it - from customers and employees to family and friends.

With sleek, design-led styling and a range of appealing finishes, the touchfree range is the perfect complement for a wide range of design aesthetics. Try a modern Matt Black finish to add a unique edge to your bathroom look, from clean monochrome minimalism to decadent hotel luxe. Chrome contrasts beautifully with organic textures for fresh Scandi chic styling, while versatile Nickel adds an elegant touch to both contemporary and heritage bathroom designs - opt for brushed Chrome and Nickel finishes for a softer, more subtle look.

Presenting the latest in touchless technology, the Dolphin touch-free taps eliminate the need for manual operation. Hands-free functioning not only ensures less wear and tear but also improves hygiene. The unique Self-Monitoring Analysis and Recording Technology (SMART) allows facilities managers to connect via the Dolphin InForm App when used with the (optional) Bluetooth Adaptor and easily keep track of and analyse water usage. The data can be used to modify settings such as flow rates, water run time, etc. and save water.

Hand-crafted and built for long-term performance, the spouts are elegantly encased in a stylish design and wall-mounted for a neat finish.

Taps on this page require a Mixer Valve details below

**Recommended for use with all Touchless Taps and Push Taps**

**Compliant with HONEYCOMB Clinic Aerator (page 6)**
AERATORS

HONEYCOMB Clinic Aerators

- The integrated flow limiter (Flow Class Z) ensures a constant water flow: 7.5-9 l/min @ 3 bar. This type of flow restriction makes a significant contribution to preventing unnecessary contamination as a result of water spray.

- Laminar stream

- Only drinking water compliant materials used, as certified according to KTW (UBA), DVGW 270, etc.

- Improved safety and hygiene thanks to an effective four-colour concept – each colour symbolises a replacement cycle. This means it is easy to recognise and monitor whether replacement is taking place regularly and correctly.

- Minimal spray and aerosol formation, therefore minimised risk of infection with waterborne legionella or pseudomonas bacteria.

HONEYCOMB Clinic STD Insert

- Blue: NEO-40-2102-0A0
- Green: NEO-40-2102-0B0
- Red: NEO-40-2102-0C0
- Yellow: NEO-40-2102-0F0

More safety and hygiene thanks to an effective four-colour concept; every colour represents an exchange cycle which makes it easy to recognise and monitor whether the replacement has taken place as scheduled.

The exchange cycle needs to be set by the facility itself since the water and operating conditions have a huge effect on the microbiological potential contamination of the aerator.

TOUCHLESS SOAP DISPENSER SYSTEM

Multifeed Foam Soap Dispenser System
Up to 8 Foam Soap Dispensers
Uses 3.5 Litre Cartridges
2 Litre Reservoir
For Mounting Under Counter, Behind Hinged Mirrors, in Service Duct or within Cleaner’s Cupboard
Compatible with BCL632
400 x 139 x 500 mm
Chrome
DBC-DS800

Sealed Foaming Soap Refill Cartridge Pack
4 x 3.5 Litre Cartridge
DBC-AL0467

Since liquid soap in bulk refillable dispensers is prone to bacterial contamination, utilizing sealed liquid soap cartridges reduces the possibility for bacterial contamination and significantly reduces bacteria on hands whereas contaminated refillable dispensers increase bacteria on hands after hand-washing.

Compliant with WELL v2 2018 by International WELL Building Institute, W08 Handwashing, Part 2A
Wall Mounted Touchless Liquid Soap / Sanitizer Dispenser 800 ml

TOUCHLESS URINAL BOWLS
ALAVO TOUCH-FREE SYSTEM

When space is at a premium and energy-efficiency is a priority, this modular, touch free, behind-mirror hand wash system from Dolphin has got all the answers - quick to install, easy to replenish, and a pleasure to use.

Designed with input from architects, designers and clients, Alavo uses the latest technology - including touchless sensor taps, foam soap systems and high-speed low energy dryers - to save time, water, energy, soap, space and money. As an all-encompassing unit, Alavo leaves no mess on the floor and designers are free to add their own touches in the space it saves.

With everything fully integrated, the Alavo radical “plug and play” design also minimises time spent on installations; it’s a natural fit in any modern washroom, and also exceptionally easy to maintain and service.

Please contact the Sales Team for further details
WHAT IS ALAVO?

A customisable, controllable, touch-free, modular behind-mirror handwash system that is quick to install, easy to maintain, secure, stylish and can be complemented with a variety of lighting systems.

CUSTOM
Tailor design from hundreds of options

CONTROL
Adjust lighting, sensors and modes

TOUCH FREE
Infrared sensor for hygienic operation

MODULAR
Pre-built modules manufactured off-site

CONCEALED
Appliances contained behind glass mirrors

INSTALL
Rapid installation time of pre-built modules

MAINTAIN
Access to services and consumables

SECURE
Lockable control panel and mirrors

STYLE
Modern and elegant premium experience

WATER SAVING
Reduces flow rates and automatic shut off

LIGHTING
Integrate adaptable lighting systems

SEALED CARTRIDGE SOAP
Reduces contamination and maintenance
BEHIND MIRROR SOLUTIONS

High Speed Low Energy Behind Mirror Hand Dryer
**Touchless**, Self Adjusting Sensor

LESS IS MORE

We delight in taking the complex and making it simple and in making the latest innovations accessible to more people. We believe firmly in the need to make our designs every bit as aesthetically appealing as they are clear and functional. PRIMUS epitomizes our perpetual quest for beauty; purity in details and small gestures that create daily pleasures which people deserve and help them relax to enjoy a better quality of life.

INNOVATIVE TANKLESS TECHNOLOGY

AXENT tankless technology not only fulfills leading flushing and water conservation standards while using about 25% less energy-intensive ceramics than conventional siphonic toilets, it also eliminates the need for concealed cisterns and energy-wasting, maintenance-intensive electrical pumps. AXENT tankless technology is a breakthrough in toilet standards and is used by the entire Primus family.

PUT NEXT-LEVEL FLUSHING POWER INTO YOUR HOME ...

AXENT Vacuum V Flush uses a two-fold hydrodynamic system to deliver a powerful flushing action every time it is triggered. The Vacuum V Flush utilizes ‘Venturi-effect’ technology to force water through a compressed space, delivering a stream of water directly into the key spaces of the bowl, without the need for noisy pumps or bulky tanks.

... WHILE USING ADVANCED SIPHON TECHNOLOGY FLUSH POWER

Similar to a vacuum suction effect, a nearly instantaneous siphonic effect pulls all waste out of the toilet bowl until the wastewater has been completely evacuated and the bowl refills with fresh water to form a water seal ensuring odour development is contained and ceramic surfaces in the bowl remain clean.

Discover more at www.sanipexgroup.com
EASY CLEAN AND ANTI-BACTERIAL GLAZE

At 1220 °C, the sterilizing glaze is burnt on the surface of the ceramics, improving the overall expression of the ceramics with it. Containing antiseptic silver-ions, Easy Clean can effectively prevent the growth and reproduction of bacteria and therefore reduce the use of chemical cleaning agents, reducing environmental pollution.
