

SMALL
FORMAT

SANIPEXGROUP

SMALL FORMAT. BIG IMPACT.

Intricate texture, playful shapes and vibrant palettes, our small format collection allows you to create a unique space with flexibility of laying pattern.

History taken back from traditional ceramic craftsmanship of a bright coloured tile, the style and design develop throughout, following the trend of modern neutral hues. Small format tile is a classic yet contemporary design to highlight any areas of the room, adding shades and personality - whether it is an accent wall, kitchen backsplash or cafe counters.

Discover our collections that best complements your vibes.

SLAB FABRICATION FACILITY

Our Slab Fabrication Facility contains state of the art equipment including three, 5 Axis water jet cutting machines, a skirting and profiling machine and several multi-blade cutting devices.

Additionally, it houses a full-service technical laboratory, installation workshop, research & development center for bathrooms and a dedicated customer showroom for manufactured slab products. Without a doubt, it is a unique facility in the market and takes the company’s capabilities and potential future opportunities to an exciting new level.

The facility will allow SANIPEX GROUP to accelerate the development of its slab product portfolio, offering new finishes, product types, categories and styles along with the ability to design and engineer customized solutions. In addition, SANIPEX will be able to offer a variety of value-added cutting services for tiles such as skirting, grooving, profiling and resizing.

CUTTING & CUSTOMIZATION

What We Do

We facilitate the precision cutting of porcelain stoneware tiles and slabs to exact specifications for a seamless fit before handover.

Our state-of-the-art Slab Fabrication Facility in Jebel Ali, Dubai, houses advanced machinery, including 5 Axis water jet cutting machines and a skirting and profiling machine. This setup offers endless, cost-effective design possibilities for the discerning client.

What We Offer

One-of-a-kind solutions tailored to your requirements are crafted by our in-house skilled artisans. To broaden the capabilities, we offer a range of value-added cutting services such as steps, skirting, custom mosaic cutting, grooving, profiling, and resizing.

With an extensive supply of luxury tiles and slabs readily available at our Jebel Ali warehouse, we guarantee a fast turnaround of custom solutions, from design selection to delivery.

Turn Your Vision into Reality

Select your tile or slab of choice from our extensive collection, and our production team will assist in turning your vision into reality, delivered to suit your schedule.

Whether you need precision-cut mosaic spa tiles, a custom outdoor kitchen, or a large quantity of elegant wash basins and countertops, count on our expert team to deliver tailor-made results that align with your creative vision.

Our Services

Bespoke Solutions expertly produced and cut by our new Slab Fabrication Facility. SANIPEX GROUP now offers new finishes, product types, categories and styles along with the ability to design and engineer customized cutting solutions.

Advice On Laying, Grouting & Maintenance

IMPORTANT NOTE: TILES SHOULD BE LAID AND GROUTED ONLY BY PROFESSIONAL TILE LAYERS.

Tiling

Follow the simple rules below to guarantee perfect tiling results:

- 1) Check the floor slab is flat where the tiles are to be fitted.
- 2) Ensure that the tiles are correct as per its intended use before laying.
- 3) Dry lay the tiles, ensure intended lay-out will be achieved, mix if necessary by taking them from several boxes to achieve best results, before actual installation.
- 4) Use the correct adhesive and application tools, apply as per its manufacturer's recommendation.
- 5) For installing wall tiles, it is highly recommended to use class C2 adhesives, in compliance with the European standard EN 12004. Specifically, recommended is a white glue for non-slip ceramic covering materials.
- 6) For top-class results, add an elasticator, taking care to follow the manufacturer's instructions to the letter, and apply an even layer of glue on the underside of the tile. The thickness of the glue can be adjusted using the toothed side of the trowel.
- 7) Do not leave air pocket between substrate and the tiles.
- 8) Follow recommended joint for tiles.
- 9) Handle the tiles with care before and during tiling.

Grouting

Use matching grouts – follow recommended joint space. The tiler should strictly follow the grout manufacturer's instructions on application and cleaning.

Cleaning

Use cleaning tools that are perfectly clean themselves. Always rinse off surfaces. Use clean water alone if the surface is washed frequently.

Recommended Joints:

Rectified (Outdoor)	3-5 mm approx.
Non-Rectified (Outdoor)	5-6 mm approx.
Rectified (Indoor)	Minimum 2 mm
Non-Rectified (Indoor)	3-4 mm approx.
Hexagon or similar shapes	3-5 mm approx.
Modular pattern (Mix of sizes)	3-5 mm approx.

For tiles more than 30 cm width, with a lengthwise tiling layout, maximum 1/3 offset between panels.

Applying The Adhesive

The adhesive needs to be spread in straight lines, parallel to the short side of the tile to make it easier to push the air out. The direction in which the adhesive is spread onto the substrate must be the same as the direction of the spreading on the back of the tile.

OK Correct application

OK Spreading on substrate and tile in same direction

NO Incorrect application

NO Spreading on substrate perpendicular to spreading on tile

Levelling

An explanation on assessing surface flatness, checking flatness cannot be done with the tiles in vertical, inclined or cantilevered positions, but only as indicated by Standard EN 14411:2016: place a tile on a horizontal, stable surface, then place a straight-edge over the surface of the tile. If the maximum flatness deviation is equal to or less than 2 mm, the material is compliant with the standard. Levelling tools are also recommended to achieve great installation results.

After Installation Cleaning Guide Details

For washing after laying and for end-of-work cleaning: wet the surface well with water before washing. Then use Fila Deterdek Pro diluted at a ratio of 1:5 or 1:10 (1 litre of product in 5 or 10 litres of water). Apply the solution a few square metres at a time, then add, allow contact time of 5 minutes, then work with a single disc cleaner or large brush. Remove any residues using a cloth or liquid vacuum cleaner and rinse with abundant water. Should any stubborn dirt residues remain, repeat the wash with more concentrated solutions, and use the Fila Deterdek without any additional water.

Caution: Do not use Fila Deterdek Pro on polished marble or on any materials that are sensitive to acids. Before using on this material, carry out a test on a small surface area to check that it is actually resistant to the product. For items in aluminium, follow the instructions and use a soft sponge.

Dimensions Tolerance From Work Size Within 1 Batch					
Porcelain - Technical Specifications			Standards	Values Required Non-Rectified	Rectified
Sizes Dimensions		Length and Width	ISO 10545-2	±0,6%, max 2mm	±0,3%, max 1mm
		Thickness		±5%, max 0,5mm	±5%, max 0,5mm
		Wedging		±0,5%, max 2mm	±0,3%, max 1,5mm
		Straightness of the edges		±0,5%, max 1,5mm	±0,3%, max 0,8mm
		Flatness		±0,5%, max 2mm	±0,5%, max 2mm

Difference Between Nominal Tile Size & Work Tile Size (Caliber)

Nominal Tile Size

Used by manufacturers and retailers to indicate the **approximate size** for tiles, and is usually stated on the box, catalogues and websites.

Work Tile Size (Caliber)

The exact dimensions of each individual tile, measured from edge to edge and might differ from production batches. Moreover, this variation on sizes is within standard norm of tolerance.

Ceramic Specifications

- Indoor
- Wall
- Water Absorption 5 - 10%
- Softer and easier to cut

Porcelain Specifications

- Indoor & Outdoor
- Wall & Floor
- Water Absorption 0.1 - 0.5%
- Strong and impervious

V Shade

Nuances / Shade & Aspect Variation of tiles in the same collection

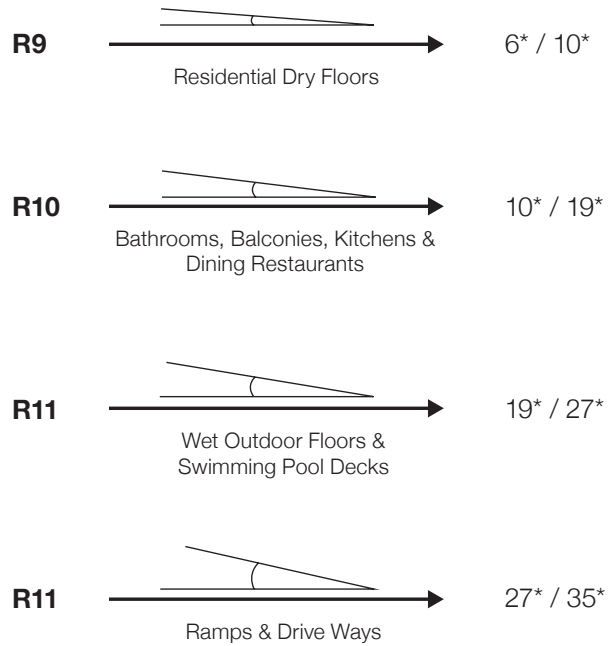

NOTE: FOR TECHNICAL DETAILS OF YOUR SELECTED TILES PLEASE CONTACT OUR SALES TEAM

What is R (non slip) rating?

International standard of ramp testing on resistance to slipping of tiles when exposed to different level of moisture

Terminology

Rectified

Tiles with straight edges, allows tiling arrangements with very narrow joints.

Calibre

It's the facial dimension (size) and is measured with a tool called a caliper. Using different calibre sizes results in a variation in grout joint widths.

Water Absorption

Measurement of how much moisture a tile is likely to absorb on on-going basis.

Stain Resistance

Method applicable to all working surfaces of tiles to determine their resistance to stains after 24 hours of applying a staining agent.
