

A modern outdoor spa is the central focus, set in a landscaped area with a building in the background. The spa is a rectangular, light-colored unit with a dark base, filled with clear water. To the left, a metal towel rack holds a white towel. To the right, a shower head is visible. The background features a building with large glass windows and a small tree with red flowers. The overall scene is bright and modern.

TRENDS 2025

BRASSWARE TRENDS

Brassware is experiencing a renaissance in bathroom design, and it is no longer just about functionality. Today's trends are focused on making a bold statement with striking colours, unexpected textures, and artistic shapes that elevate the entire space. Move beyond chrome and explore the warmth of brushed gold and brushed bronze, along with modern finishes that use galvanic coating, powder coating, armour coating, or PVD. Embrace the drama of matt black or the industrial-chic allure of gun metal. Mixed metals are also gaining traction, offering the opportunity to create a unique, personalised aesthetic.

THE NEW WAVE OF SANITARYWARE

Sanitaryware is stepping into the spotlight with bold new colours, innovative materials, and eye-catching silhouettes. Think sleek matt finishes, unique countertop designs, and sculptural sanitaryware that makes a statement. Don't shy away from colour—vibrant tones like dramatic red add personality and style. Reimagine your bathroom with pieces that are as stylish as they are functional.

BRASS GONE BOLD

Brassware is bolder than ever. Embrace a world of captivating colours, textures and finishes that will transform your bathroom into a luxurious personal escape. Whether you choose brushed gold for a touch of vintage glam, matt black for a sleek and modern feel, or gun metal for an industrial edge, you can keep the look uniform or mix and match for a personal touch.

FURNITURE REDEFINED

Furniture gets a serious style upgrade with bold colours, sustainable materials, and statement pieces that tell a story. Express your style with luxury bathroom furniture solutions in a range of effect finishes like natural wood and adorning marble terrazzo countertops, vanity units and bathroom mirror cabinets.

1882

Rubinetterie Stella S.p.a. has been an icon of “Made in Italy” for almost 140 years in the production of taps and bathroom accessories. Founded in 1882 in Cireggio on Lake Orta as a foundry and lathe workshop, the company quickly specialised, at the behest of its founder Pietro Stella, in the production of faucets and bathroom accessories. Already in the early 1900s, Rubinetterie Stella positioned itself at the top of the sector, thanks to innovative design and high craftsmanship: its faucets have accompanied Italy’s history thanks to their constant presence in famous hotels and private residences worldwide.

Stella products embody experience, industrial research, and meticulous craftsmanship in every single component.

Each Stella product is an original, drawing value from aesthetics, functionality, and technology taken to the highest level.

STELLA

Francis Sultana is an interior designer born in Malta and based in London regularly featured on Architectural Digest's annual AD100 list. With "luxury, bespoke, and sumptuous" style (Living), in which he manages to mix "baroque and pop art" (Financial Times), he finds perfect expression in the project - in which he created the concept that later becomes the Ennio collection- of La Palma in Capri.

ENNIO: A collection designed by architect Francis Sultana for Stella, who drew inspiration from the neoclassical column whose vertical groove echoes, softening its shapes, thicknesses and completely rethinking its proportions, creating a harmonious play of curves and reflections. Its design is prestigious, with important but sober volumes, refined even in its range of accessories.

Matteo Thun

MATTEO THUN & ANTONIO RODRIGUEZ

In partnership with Matteo Thun since 2003, Spanish designer Antonio Rodriguez follows the principle of “remove rather than add” and pairs sophisticated aesthetics with intuitive functionality and innovation. Matteo’s and Antonio’s work stands for timeless simplicity, mindfulness and a clear design language shaping iconic products and architectural projects to ensure the enhancement of the everyday.

Water is a source of life and as a stimulus of cultivation and refinement. The use of water is a ritual that is not carried out unconsciously - it means pleasure and joy, hygiene and purification. Handling with water is a true culture.

As AXENT is a global brand, the focus of the design process was to create simplicity while offering a cross-cultural design, with simple elegant shapes and refined lines in a variety of exquisite materials. Therefore, when designing ZERO, the new product for the AXENT brand, the aim was to combine simplicity with sophistication, the purity of shapes with the preciousness of details.

AXENT.ZERO is about timeless beauty. High quality ceramic and pure, slim shapes meet numerous possibilities to blend.

The AXENT.ZERO shower toilet honors the water source through the use of innovative hidden technology and electronic water-shower. Its design aesthetic follows the principle of “remove rather than add”.

The pure and clear shapes are only supported by a two-tone option: the combination of metal and ceramic forms an elegant detail in a subtle yet elegant way.

AXENT.ZERO simultaneously meets the needs of private use and those in the hospitality sector – it is all about silent luxury.

Geberit's long history started in 1874 with the opening of a plumbing business in Rapperswil, Switzerland, by Mr. Caspar Gebert. Since these very early days our history has been lined with many innovations which have not only set new industry standards, but also have played an important role in setting the stage for the products that are found in today's modern bathrooms. Geberit pioneered the innovative concealed cistern back in 1964: the innovation to place the cistern inside the wall changed the look of bathrooms around the world.

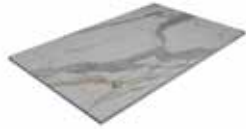

Geberit is still setting trends with comprehensive sanitary systems and solutions utilising its know-how in installation and flushing systems. Through constant research and development Geberit makes sure that their technology and design not only meets standards but is state-of-the-art.

Panels make an impact on the atmosphere of your sauna. The colour, grain, and cut of wood chosen for the walls and ceiling sets the backdrop for your sauna design. Medium and darker toned panels evoke traditional and natural feelings, whereas lighter panels allow dark interior elements to pop from the backdrop.

Windisch

It all began in Barcelona in 1934, when Hans Windisch founds a company for handcrafted decorative articles made from brass. Windisch has one goal: to make everyday life a unique experience. The brand offers not only products but a heritage of excellence that is reflected in every piece created.

Exporting their products to more than 80 countries, Windisch is already the fourth generation of the same family that continues to handcraft brass and crystal glass into innovative bathroom articles.

Its essence is the perfect fusion of tradition, quality and experience. The dedication to handcrafted production distinguishes the brand and translates into the unequalled quality of its products, turning each bathroom into an elegant and unique space.

Items designed to endure over time and in memory. Items that turn your everyday moments into something extraordinary.

FINISHES:

FAP Ceramiche offers a catalogue of over 30 collections: decorated, coloured, polished or satin-finish tiles; lines that take their inspiration from marble, stone or wood; mosaics and special trims for a perfect finish.

A range of white-body covering products that include both traditional, non-rectified sizes and larger surfaces with squared edges, suitable for a continuous, jointless wall. The offer includes collections in porcelain stoneware, in which the power of cutting-edge technology teams with the design expertise the company is famous for: the enormous variety of sizes includes MAXXI sizes of up to 120x278. This is a catalogue able to give shape to the needs of those seeking inspiration for furnishing their home, featuring options in rich colours or delicate nuances, representing the perfect blend of ceramic tradition and contemporary design.

We design with nature.

Art and the hand of Man move the stone to reveal its structures and volumes. Coem uses technology to interpret these movements, applying them to an industrial item that becomes a design product that everyone can enjoy.

Coem research carries forward project ideas that emerge in the present and inspires us to imagine the future through intuitions and processes that follow a set of rules. Design works differently from art, requiring a careful eye on the world that revolves around new ideas, evolves through theory and technique and forms a close, intricate relationship with production systems and the beauty of living.

Just like nature, design cannot exist without a plan, and it is this awareness that brings us collections in porcelain stoneware that are increasingly durable, beautiful, functional and accessible. Because Coem designs ceramics to engage with the world.
