# **SANIPEX GROUP** **trusted by** **the experts.**

For over 30 years, we have built our prestigious product portfolio, extended our client base and propelled our business to service Middle East, Africa, Europe and Asia through our Retail, Trade, Project and Digital Channels. Combining the highest quality bathroom, kitchen, surfaces, lifestyle, lighting and outdoor living solutions with exceptional customer service, SANIPEX GROUP always delivers.

Established in Dubai, UAE in 1995, SANIPEX GROUP has grown to encompass flagship showrooms in key locations including Dubai, Abu Dhabi and London, alongside an established presence with partner retailers worldwide.

From commercial projects to residential developments, we assist our client base of architects, designers, developers, retailers and consumers to create beautiful spaces.

Working with many market-leading brands and supported by its own strong portfolio of products ensures SANIPEX GROUP is ready to deliver for your next project with strategically placed logistics centres in key locations.

Offering consistently high service levels, at SANIPEX GROUP, the customer always comes first.

**Aquaeco** Deck Mounted Eco-Powered Touchless Basin Mixer

**eco** conscious.  
**eco** focused. 

Competitive and compliant public washroom and plumbing solutions for standout and affordable specification within high-traffic spaces. Offering a compelling combination of quality, reliability and outstanding value, BAGNODESIGN – along with our sub brand AQUAECO – offers an extensive selection of sanitaryware, touchless taps & dispensers, bidet sprays, valves, flush plates and more in on-trend finishes – fulfilling the market requirement for stylish yet serviceable solutions.

Industrial grade 304 and 316 stainless steel is used for products like medical & supportive solutions and outdoor showers due to its hygienic properties and anti-corrosive performance, ideal for various spaces. Eco-friendly features like touchless technology helps to decrease water, product and energy consumption while improving hygiene.

# projects from around the world.

Transform washrooms into exceptional, user-friendly and inclusive spaces with our comprehensive and innovative range of solutions.

From busy public spaces to the most exclusive hotel suites, our high-quality washroom solutions are meticulously designed to perform in high-traffic spaces, without compromising on style. Our portfolio is suitable for a wide range of environments, including:

- Commercial Developments
- Hospitality & Leisure Destinations
- Institutional Facilities
- Entertainment Venues

# stand out with our finishes.

Elevate every detail. Our finishes bring depth, character, and refinement to any washroom, ensuring every touchpoint performs flawlessly and looks exceptional. Warm Tones respond to the enduring trend for warm metallics, Timeless Classics are made for both bespoke and contract bathrooms, and our Armour Collection brings bold accents in either earthy or bold tones.

# armour coating. built to last.

A new evolution of bathroom finish. Developed to withstand the test of time. The Armour Coated finish is a highly advanced coating applied at our in-house production facility in Dubai. Originally developed for heavy-duty products in military, aerospace, and automotive industries, where durable materials and finishes are essential, Armour Coating allows for aspirational finishes that are built to last.

10-Year Guarantee\* - This is backed by the assurance of laboratory tests which include salt spray (corrosion) testing, chemical resistance testing and adhesion testing, as well as rigorous real-life durability testing.

DOLPHIN

**washwall**

system.

all-in-one

# washwall solo system.

*tailored to fit your washroom project needs*

Introducing the Dolphin WashWall Solo System, a groundbreaking evolution in behind mirror design that redefines elegance, functionality, and adaptability in public and commercial washrooms.

It contributes to a more organised, user-friendly washstation experience, enhancing efficiency in hand hygiene practices by attracting individuals to the essential handwashing amenities. This strategic mirror design helps users quickly identify and access the behind mirror hand dryers, sensor taps, paper towel dispensers, and soap dispensing locations, ultimately enhancing the overall flow and user experience within the washroom.

One Connection Plumbing

Up to 8 WashWall Solo in a run

Smart Technology Ready

**Project:** Melbourne Airport Terminal 1 & 3, Melbourne, Australia

DOLPHIN

## washwall system.

*mirror the future of commercial washroom design*

The Dolphin WashWall System is an industry-recognised, fully integrated handwashing system that seamlessly integrates behind mirror taps, touch free soap dispensers, hand dryers, paper towel dispensers, and LED lighting within a sleek, modular mirror unit.

Designed to reduce clutter and maximise space, the Dolphin WashWall System enhances hygiene, efficiency, and aesthetic appeal in all commercial washrooms and public washroom facilities.

### what is a **dolphin washwall system**?

A customisable, controllable, touch-free, modular behind-mirror handwash system that is quick to install, easy to maintain, secure, stylish and can be complemented with a variety of lighting systems.

-  **customised**
-  **wireless control**
-  **touch free operation**
-  **modular**

# washroom benefits & features.

*washroom solutions - designed for every space,  
built for modern demands*

Our washroom solutions are designed to transcend basic functionality, serving as a comprehensive ecosystem where intelligent engineering, sustainable performance, and refined aesthetics converge. By integrating these core pillars, we deliver environments that are not only impeccably clean and dependable but also remarkably effortless to maintain, even in the highest-traffic settings.

Completely transform any washroom into a space defined by a harmonious balance of sleek, contemporary design and future-ready innovation. At the heart of the range is advanced sensor technology, meticulously housed within a minimalist form factor. This creates a fully touchless, intuitive experience that significantly enhances hygiene standards while simultaneously optimising water consumption through precision flow control.

Every component is crafted from premium, high-grade materials and engineered for enduring durability, ensuring the system can withstand the rigors of heavy daily use without compromising its visual appeal. Whether it is for high-end hospitality venues, corporate headquarters, or modern institutional facilities, our range of taps and mixers stands as the definitive choice for those seeking a superior, long-lasting washroom experience that supports both sustainability goals and a premium brand image.

## smart system.

### *self monitoring analysis & recording technology*

Presenting the latest in infrared technology, the Dolphin touch-free taps eliminate the need for manual operation. Hands-free functioning not only ensures less wear and tear but also improves hygiene. The unique Self-Monitoring Analysis and Recording Technology (SMART) allows facilities managers to connect via the Dolphin InForm App when used with the (optional) Bluetooth Adaptor and easily keep track of and analyse water usage. The data can be used to modify settings such as flow rates, water run time, etc. and save water.

## hygiene flush.

*built-in water safety*

Each tap is programmed to perform an automatic flush with fresh water when not in use. The standard flush cycle runs for 6 seconds. Intervals are factory-set to 24 hours, but can be adjusted to 12, 24, or 48 hours using the remote control. This function ensures that stagnant water is regularly displaced throughout the system.

# hygiene flush benefits & features.

## advantages to using hygiene flush

Designed to support **optimal hygiene** and **long-term performance**, the system promotes regular water exchange to minimise stagnation and significantly reduce the risk of Legionella growth and biofilm formation within the pipework. Continuous water movement helps keep internal components such as valve rubbers and seals in good working condition, reducing deterioration, preventing premature wear, and ensuring reliable, trouble-free operation over time. Particularly beneficial in low-use areas or taps located at system extremities, the solution maintains consistent water turnover across the network while supporting compliance with stringent hygiene, infection-control, and water-safety standards required in healthcare and other sensitive or regulated environments.

## how to use hygiene flush

The hygiene flush time interval can be easily adjusted using the remote control. Position the remote control approximately 8 cm from the tap sensor and ensure it is aimed directly at the sensor window. Press the "+" or "-" button under the time setting to modify the flushing interval. The tap sensor indicator light will flash to confirm the selected setting: one flash indicates the system has entered automatic flushing debugging mode, two flashes confirm a 12-hour interval, three flashes indicate a 24-hour interval, and four flashes confirm a 48-hour hygiene auto-flush interval.

## intelligent mixers.

*step into the future*

Take a glimpse into the future of modern living with AQUAECO's new **ECO-Powered Touchless Basin Mixer**.

The innovative Eco Power sensor mixer uses a combination of AI power recovery technology and a Li-Mn battery to ensure over 100'000 operating cycles without the need for an external power source. This simplifies installation and makes it ideal for both renovation and new build requirements. The intelligent sensor function ensures optimal water usage keeping bills low. Choose from 8 luxury finishes to suit your style.

**Aquaeco** Wall Mounted Touchless Tap

# abluion area.

*fully integrated for a self-contained solution*

Ablution spaces often present installation challenges due to shallow wall cavities and the absence of under-counter cabinetry, making it difficult to accommodate conventional sensor tap components such as valves, batteries, and control boxes. At the same time, fittings must withstand continuous communal use while maintaining high standards of hygiene and reliability. Our abluion tap range is specifically developed to address these conditions through flexible installation concepts suited to both standard and premium facilities.

Depending on project requirements, taps are available in three configurations. Fully integrated models house the sensor, electronics, battery pack, and valve system entirely within the tap body, creating a compact, self-contained solution ideal for limited wall depths. Alternatively, behind-the-tap designs position valves and power components directly behind the spout, allowing straightforward servicing without dismantling walls or surrounding finishes. For more premium abluion environments, taps with a compact modular unit provide a discreet solution where all functional elements are housed in a dedicated module, enabling sleek installations even within slim partitions.

Touchless operation supports hygienic ritual use by eliminating physical contact and reducing cross-contamination, while protected internal components ensure long-term reliability in humid, high-usage environments. Across all configurations, the systems are designed for clean installation, simplified maintenance, and dependable performance, making them ideal for modern abluion facilities.

# soap dispensers.

multifeed, touchless & manual

**Aquaeo** Multifeed Deck Mounted Touchless Liquid Soap Dispenser Kit

# multifeed soap system.

*seamless bathroom experience*

The centralised multifeed soap supply system enhances washroom efficiency, especially in high-traffic environments. By integrating the Multifeed Soap Dispenser System Kit with our reliable AQUAECO dispensers, the system ensures a consistent soap supply while reducing maintenance requirements, providing a seamless experience for both users and facility teams. Designed for busy public washrooms, it delivers dependable performance during peak usage, ensuring soap is always available. Its streamlined supply design allows a single concealed 5-litre container to feed up to three dispensers, minimising refill points and improving operational efficiency. The top-fill mechanism enables fast, clean refills with minimal disruption, making it well suited for facilities that require quick maintenance turnover. With fewer refills needed overall, labour time is reduced, servicing becomes more efficient, and long-term operating costs are significantly lowered.

## *optimised soap performance*

Engineered for efficiency and ease of installation, the system performs best when the silicone soap delivery tube is kept within a maximum length of 2 metres, with shorter tubing preferred to ensure smooth flow and consistent dispensing.

To ensure reliable operation and consistent hygiene performance, our soap dispensers are designed to work with liquid soap viscosity ranging from 100–3800 CPS. Selecting soap within this recommended range allows smooth dispensing, accurate dosage control, and efficient pump operation, supporting both user comfort and system longevity. Using soap that is too thin may result in excessive dispensing, while overly thick soap can affect flow performance and increase maintenance requirements. By using the correct viscosity, facilities can maintain optimal hygiene standards, minimise servicing needs, and ensure dependable performance in high-traffic washroom environments.

# top fill.

## top fill features & benefits

Bring ease and efficiency to any washroom with the premium deck-mounted, top-fill soap dispenser, produced from high-quality brass and available in a range of refined finishes to complement even the most sophisticated interiors.

Designed for above-counter refilling, it reduces service time while maintaining a clean, seamless look. The generous 1-litre reservoir minimises refills, while dual power options – mains or battery – suit both new installations and retrofits. An integrated anti-backflow system ensures hygienic, reliable operation.

# washroom **essentials.**

dispensers, hand dryers & more

**Project:** CoEx Campus, Expo 2020, Dubai

## combination units.

*bring a new level of refinement to modern washrooms*

Crafted from high-grade stainless steel for durability, corrosion resistance and easy cleaning, these combination units offer a refined, all-in-one solution. The 2-in-1 configuration integrates a paper towel dispenser and waste bin, while the 3-in-1 model adds a centrally positioned high-speed hand dryer for a smooth, hassle-free experience. Designed for ADA-compliant installation, each unit ensures accessibility and ease of use. Ideal for commercial, hospitality and institutional environments.

Recessed Combination Unit with Paper Towel Dispenser, Hand Dryer & Waste Bin  
Mains Operated  
Holds 450 Paper Towels  
25 Litre Capacity  
220-240 V  
400 x 164 x 1480 mm

*combination unit features & benefits*

Constructed from **durable, high-performance materials**, the unit is designed for demanding, **high-traffic environments** such as commercial buildings, airports, healthcare facilities, and public spaces. Its robust construction improves resistance to daily wear and vandalism, minimising maintenance requirements, extends product lifespan, and lowers long-term operational costs. The integrated layout also enhances washroom efficiency: positioning the towel dispenser directly above the waste bin encourages proper disposal, reduces water drips, maintains cleaner and safer floors, and supports more efficient housekeeping operations while delivering a consistent, high-quality user experience.

The combination unit integrates a paper towel dispenser with a high-speed hand dryer, providing **user-centred flexibility** by allowing guests to choose the drying method that best suits their personal preference, comfort, or accessibility needs. This dual-function solution supports inclusive washroom design while helping manage paper consumption more effectively, reducing waste and supporting sustainability goals without compromising hygiene performance or user satisfaction.

# hepa filter.

*HEPA filtration for superior hygiene*

The BC28-2SCA-HEPA features an H12 HEPA filter that captures up to 99.5% of particles as small as 0.3 µm (most bacteria is 0.5-5 µm in size and other particles are even larger), delivering cleaner air throughout the drying process. This high-efficiency filtration effectively removes fine contaminants - including dust, pollen, mold spores, bacteria, and other airborne pollutants - supporting a more hygienic washroom environment.

wc, basins & grab bars

## doc m packs.

*all-in-one inclusivity & compliance*

Ensure your commercial project meets the highest standards of inclusivity and compliance with our all-in-one Doc M Packs. Designed to take the guesswork out of UK Building Regulations, these comprehensive kits provide every essential component—from raised-height toilets and ergonomic washbasins to high-contrast grab rails and emergency alarms—in a single, coordinated package. By choosing a pre-configured pack, architects and facility managers can bypass the hassle of sourcing individual parts, guaranteeing a perfectly dimensioned, accessible space that passes Building Control sign-off every time. Whether you require left- or right-hand configurations, our Doc M solutions offer a safe, dignified, and premium experience for users with limited mobility while streamlining your installation process from start to finish.

**DOC M WC Pack**

Consists of:

- Deck Mounted Touchless Basin Mixer
- Wall Mounted Wash Basin
- Rimless Close Coupled WC
- Close Coupled Cistern
- Toilet Seat Ring
- Non-Illuminated Mirror 450 x 600 mm
- 600 mm Straight Support Bar x3

## hewi mobile solution.

*quick and easy tool free-installation*

Every individual has unique requirements when it comes to architecture, interior design, and product functionality—and washroom spaces are no exception. A bathroom that is thoughtfully tailored to the diverse needs of all users reflects the true sophistication of a well-considered design concept.

With HEWI's mobile solutions, washroom environments can be flexibly adapted and customised to suit each user. Mobile hinged support rails and shower seats can be attached or removed quickly and effortlessly. Thanks to their tool-free installation, they can be fitted in just a few simple steps whenever needed. The unit simply clicks into a permanently installed mounting plate and is secured with a fixing screw. When no longer required, it can be easily detached by loosening the screw. The mounting plate is then concealed behind a discreet cover plate. In this way, the room can be designed to fulfil the user's current needs at any time without the need for additional, complex installations. Mobile backrests and other support rails are also available upon request.

# flushing solutions.

*out of sight, out of mind*

- **More Space:** Since concealed cisterns are built into the wall, they free up a considerable amount of bathroom space that would otherwise have been taken up by the cistern.
- **State-of-the-art Technology and Durability:** The range of concealed cisterns boasts high-tech working parts to ensure trouble-free operation.
- **Design Freedom:** Homeowners and designers can pair their choice of actuator or flush plate and wall-hung or floor-standing toilet pan to perfectly complement their bathroom's particular style and design.
- **Easy to Clean and Hygienic:** Concealed cisterns and wall-hung WC pans provide the ideal easy-to-clean and optimum hygiene solution – no obstacles to clean around or cisterns to clean under.
- **Good for the Environment:** All cisterns contain a dual-flush mechanism, helping to reduce running costs by saving water – using as little as two litres of water for a half flush.
- **Noise Reduction:** Since the cistern is built into the wall, any noise created by the process of flushing is significantly reduced, making this an ideal solution for en-suite bathrooms. This is also a key in any hospitality requirement.
- **Strength:** All cistern frames are designed and built to support up to 400 kg in weight.
- **Warranty:** All cisterns come with an impressive 10 year warranty.

## Concealed Cistern with Flush Plate

for Wall Hung WC  
 Front Operation  
 Universal Frame 1120 mm  
 Adjustable Dual Flush 6/3L, 5/3L and/or 4/2L

# drinking fountains.

cool, refreshing hydration

## drinking fountains.

*elevate your hydration*

Drinking fountains have become essential fixtures in modern public spaces, encouraging regular hydration that supports overall health and wellbeing. Designed for long-term use in high-traffic commercial environments, our range of drinking fountains are manufactured from high-quality stainless steel and incorporate vandal-resistant components, efficient water delivery systems, and options for both indoor and outdoor applications. Integrated bottle fillers support today's sustainability goals by reducing single-use plastic consumption and encouraging the use of reusable bottles.

**Murdock** Wall Mounted Drinking Fountain

# Barbie x HEWI

*a vibrant world of colour*

The new Barbie™ x HEWI sanitary collection combines timeless Bauhaus design principles with the iconic colour palette of Barbie™ to create a series that celebrates individuality and inclusivity, bringing optimism and joy into any space. Pale pink, as a symbol of hope and creativity, blends with classic white and deep black to create a harmonious colour scheme that reflects freedom and self-expression.

These products represent iconic design and creative possibilities, transforming any bathroom into a space of inspiration and individuality. Whether as subtle accents or a cohesive stylistic concept, the collection offers diverse options for everyone who loves design.

As the exclusive distributor for the UAE, Oman, Qatar, and Saudi Arabia, we proudly bring this unique collection to the region—offering designers, developers, and contractors a standout solution that elevates accessibility, creativity and visual impact.

A close-up, high-angle photograph of water splashing into a dark, circular drain. The water is captured in mid-air, creating a dynamic, textured pattern of droplets and ripples. The lighting is dramatic, highlighting the individual water molecules and the dark, metallic rim of the drain. The overall mood is clean and industrial.

# space saver.

*space saver bottle trap with filter*

The new space-saving bottle trap enables easy installation in tight spaces, especially where the furniture base is near the siphon. Its front-facing siphon cup, removable via two side clips, allows quick inspection and thorough cleaning. Direct access to the wall drainpipe also simplifies maintenance.

**Bagnodesign**

Space Saver Bottle Trap 1 1/4" with Filter  
 Polypropylene  
 Vertical Adjustment 65-320 mm  
 Horizontal Adjustment 75-330 mm  
 80 x 177 x 350 mm

**quick & easy access**

The siphon's body is equipped with two practical closing clips, allowing an intuitive and quick inspection, accessible to any user.

The main feature of this item consists in the possibility of extracting the siphon cup from the frontal side by simply opening the 2 clips.

# water saving solutions.

*making a difference*

**Reduce water consumption significantly** with AQUAECO's comprehensive range of aerators and connection fittings, engineered with advanced Neoperl flow-limiting technology. These precision components are designed to optimise water efficiency at the point of use, delivering a **40–50% reduction in water consumption** without compromising comfort or functionality. By regulating flow while maintaining consistent pressure, the aerators ensure a smooth, well-aerated water stream, meaning showers and mixer taps **continue to perform effectively** with little to no noticeable difference for the user. Ideal for both new installations and upgrades, the products are **easy to retrofit** and require minimal tools or downtime, making them a practical solution for residential, commercial, and hospitality settings. In addition to lowering water usage, they help reduce energy demand associated with hot water production, supporting sustainability goals while delivering immediate cost savings and long-term environmental benefits.
